## THUMPR HYDRAULIC ROLLERS

Comp Cams  
800/999-0853  
[www.compcams.com](http://www.compcams.com)

The engineers at Comp Cams know that sometimes the right sound can make the car, so for the new Thumpr line they focused on pitch-perfect musclecar sound by creating the ideal combination of lobe-separation angle and duration. Now anyone with a 221-351ci Ford Windsor engine built between 1969 and 1995, 273-360ci Chryslers built from 1964 to 1991, and 262-454ci Chevys originally equipped with a flat-tappet valve-train can get the sound and the fury without sacrificing driveability with these roller retrofits. The Thumprs are available in three different levels: Thumpr, Mutha' Thumpr, and Big Mutha' Thumpr. You love those names. Price: \$312.05-\$328.05

## STAINLESS THERMOSTAT HOUSING FOR 302/351 FORDS

Performance Stainless Steel  
866/335-7901  
[www.performancesst.com](http://www.performancesst.com)

Performance Stainless Steel has a new line of 304 stainless steel thermostat housings for 302-351ci Fords to complement its Chevy line. The housings have nipples for 1½- and 1⅞-inch hoses and either a 45- or 15-degree neck. A Cometic gasket and stainless steel mounting hardware are included. Price: \$144.95-\$164.95

# INFORMATION IS POWER

MSD's DashHawk multi-gauge delivers the information to make your vehicle perform! One simple connection delivers vehicle details such as rpm, MAP, temperature, TPS and even fuel economy. Set alerts, record 30 minutes of data, measure performance and even diagnose and clear trouble codes.

- Displays and records 0-60 time and 1/4 mile et/mph
- Universal display scrolls through over 150 parameters
- Advanced data logging with max values for speed and rpm
- Built-in shift light functions
- Check and clear trouble codes

Check [www.dashhawk.com](http://www.dashhawk.com) for your application.
